Clippings. FAITH. Notes.

FAITH.

"THE trouble is," said Harold Raymond, on his return from his second year in college, "that when you enter the sphere of religion, you deal with something quite different from anything that you meet in science. In the one you move step by step along lines of induction or deduction, and in the other you fling a highway through the air, in a bold and beautiful manner, but in a way quite different from that of science."

"I am not sure that the difference is so great as we are accustomed to suppose," replied his friend. "I have been thinking how scientific faith is, or, rather, how large a part faith plays in science. No man ever made a great discovery that was wholly an accident. Even if he were seeking the Northwest Passage and found America, it was faith that was guiding him."

"But it is a very different thing from what you call faith, isn't it?" asked Harold. "Faith seems very vague as compared with the processes of science."

"I don't think so. I have wondered how it would seem if we were to try to add some modern names of science to the great muster-roll of faith in the eleventh chapter of Hebrews."

"I should like to hear how it would sound."

"By faith Columbus, when he was called of God to discover a new world, went out, not knowing whither he went. By faith he sailed strange waters, with Cabot, Magellan, Vespucius and Balboa, the heirs with him of the same promise.

"By faith Copernicus lifted the earth from its solid base and set it to moving in rhythmic order round the sun; and all the suns and sons of suns with planets in bright array that circle round the throne of God. This he beheld by faith.

"By faith Laplace understood how the worlds are made from star-dust; and Newton beheld in the fall of the apple a force that holds the worlds in place, and that not by things that do appear.

"By faith the men of science, who did not always call themselves men of faith, found substance in the things hoped for, and moved from experiment to hypothesis and from hypothesis to theory, and from theory to fact and

from faith to sight; and all these were the children of faith.

"And what shall I more say? For time would fail me to tell of Stephenson and Fulton, or Morse and Roentgen and Edison and Lister; of Cyrus Field and Alexander Bell and Marconi and Wilbur Wright, who through faith made iron float, yoked chariots to the invisible power of steam, caused the voice of man to be heard by his fellow man at a distance of a thousand miles, filled the air with voices inaudible to the ear, but intelligible to the mind of faith, and lifted the bodies and the minds of men on wings of wonder, and set them to sailing amid the clouds.

"By faith they built railways, irrigated deserts, crossed the trackless ice to the poles; subdued climate, overcame hardship and incredulity; out of weakness were made strong, and added to the space and comfort of human life, and gave wonderful analogies to those who seek the farther knowledge which is by faith.

"Now they who do such things all die in faith, and none of them fully receive the promise, God having provided some better thing that we, too, should learn the lesson of faith, and follow their steps.

"'And wherein we have learned from saints and apostles, and the Lord of life, and have found sure footing for faith, let us not count it unreasonable that still we follow, and live the life of faith."

WORLD'S GREATEST SKIN CURE
and Purest and Sweetest of Emollients
for Skin, Scalp, Hair and Hands
is Cuticura Ointment.

Cuticura Ointment is beyond question the most successful curative for torturing, disfiguring humors of the skin and scalp, including loss of hair, ever compounded, in proof of which a single anointing with it, preceded by a hot bath with Cuticura Soap, is often sufficient to afford immediate relief in the most distressing forms of itching, burning and scaly humors, eczemas, irritations and inflammations, permit rest and sleep, and point to a speedy cure of infants, children and adults when all else fails.
